INTRODUCTION

INTRODUCTION

Virginia Tech interior signage standards are established by the Office of University Planning as a component of the Virginia Tech D.C.S (Orange Manual).

The campus has signage standards to provide consistent wayfinding and visual uniformity throughout campus. Wayfinding is the practice of planning and providing for clear paths of travel and clearly defined destinations through visual cues and the application of signage. A consistent design aesthetic, as well as typical applications, assists the campus community and its visitors with finding their destinations more easily.

Interior signs are organized in three different groups: Regulatory, Room Identification, and Directional, Emergency Evacuation, and Informational.

This document also introduces the documents needed for a complete interior sign submittal for a project to Virginia Tech. These documents include a signage installation plan, a signage schedule, and finally, evacuation and directional sign examples.

A decorative graphic consisting of a solid orange line that starts as a diagonal stroke from the top left and then turns into a horizontal line that forms the top-left corner of a dashed rectangular box. The text "DELIVERABLE EXAMPLES" is centered within this dashed box.

DELIVERABLE EXAMPLES

DELIVERABLES

This document introduces the documents needed for a complete interior sign submittal for a project to Virginia Tech. These documents include a signage schedule, a signage installation plan, and evacuation and directional sign examples.

The signage schedule will be provided by the A/E responsible for the project. These files are available from the owner or project manager or OUP.

Signage Installation plans will be provided by the A/E responsible for the project.

Evacuations signs will be provided by the A/E responsible for the project. These files are available from the owner or project manager or OUP.

Directional signs will be provided by the A/E responsible for the project. These files are available from the owner or project manager or OUP.

Deliverable Examples

Signage Installation Plans

Signage Installation plans will be provided by the A/E responsible for the project.

Deliverable Examples

Evacuation Signs

Evacuations signs will be provided by the A/E responsible for the project. These files are available from the owner or project manager or OUP

BRANDING + FONTS

Branding

Identifying Standards

About Our Name: Our official name is Virginia Polytechnic Institute and State University, but using “Virginia Tech” is preferable in all but formal uses. Virginia Tech is used in news releases, feature articles, and publications and on the web. When using the full name of the university, never use an ampersand instead of “and”. Never use VPI&SU, VPI and SU, VA Tech, Or Virginia Tech University. “Tech” is acceptable after a first reference to “Virginia Tech”, but it should not be used repeatedly or solely. “VT” and “Va. Tech” are acceptable only in limited informal situations, such as a news headline where space is tight. Do not use “VT” or “Va. Tech” in body copy, in titles of publications, on signs, or in any formal publication.

University Seal

Athletic trademarks are applicable only in athletic and informal usage and must not be used for academic applications, academic products, or university. Using the university seal in non-university publication is prohibited without prior approval from the University.

For more information on branding please see University Relations at:
<http://www.unirel.vt.edu/>

ADA Compliance

Typography

Overview

To ensure legibility of signage Arial or Helvetica will be used in interior signage. This promotes consistency across ADA compliant signage.

Arial regular typeface and Helvetica typeface are used on interior signage because it is a universal non-serif standard that is easy to read. Currently, Helvetica is the font used for the ADA band raised number and lettering.

We will retain Helvetica for raised signage numbering/lettering to maintain ADA legibility as well as retain Arial for printed signs to maintain ADA legibility compliance and ease of use for end users printing the templates.

Typography

Arial

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
